

RBRO SOLUTIONS

Our knowledge, your imagination. Powerful software.

CaseLink

Product Description

CaseLink, developed by RBRO Solutions, is an integrated solution which enables CaseWare software to function in conjunction with the Autonomy iManage WorkSite Document Management System. CaseLink was developed to provide a more productive environment for users in the accounting industry working with both CaseWare and WorkSite.

Storage & Retrieval

CaseLink enables firms to easily store and retrieve entire CaseWare projects or single documents within the WorkSite document repository.

Link or Export

CaseLink allows users to save PDF copies of CaseWare documents directly to the engagement Workspace in WorkSite. CaseLink also allows users to create WorkSite document links within CaseWare.

Project Archive & Executive Review

At the end of a project, it is possible to create a PDF archive of the entire CaseWare file structure within WorkSite in order to have long-term access to a static record of the engagement documents. By clicking on the "Synchronize to WorkSite" option from within the CaseWare application, non-CaseWare users access relevant information from within WorkSite. Completed work papers can now be added to workflow processes for quick review by management.

Features & Benefits

CaseWare users now have the full benefits of working with WorkSite including:

- Single point of access for all client related content
- Tracking document versions
- Profile documents
- Full text search documents
- Extranet access to clients

WORKING PAPERS

CaseWare Working Papers is a highly flexible engagement software that provides you with everything you would expect from an assurance and reporting tool and much more. Working Papers allows for real time updates, full annotation capabilities, task management and powerful version control at the document, cell and account level, electronic review has never been easier. From the financial statement, you can drill down through the supporting schedules and documents all the way to the detailed data. You can plan, perform, and review your entire engagement on screen, completely eliminating paper.
