

THE COMPANY

RBRO Solutions is committed to providing its clients with the best of breed technology solutions and the highest level of end-to-end services, integrated software products, and customized snap-in software solutions. We are partnered with global leaders specializing in ECM solutions, providing adoptable and scalable improvements to increase business efficiency and agility.

RBRO team members are chosen for their integrity and belief in the pursuit of excellence along with a solid commitment to client service.

THE OPPORTUNITY

In this role, you can expect to:

- Build your career with a vibrant technology company
- Work in Pickering where you can reduce your commuting time and avoid traffic headaches
- Enjoy a business casual working environment
- Look forward to a competitive salary and medical benefits

THE POSITION

If you want to become an integral member of a progressive organization and create products that drive our business, look no further. We are currently seeking a skilled Developer Analyst specializing in web technology to join our team. Your responsibilities will be to:

Daily Activities:

- Design, analyze, test, debug, document and implement complex computer programs, applications and/or systems primarily related to web applications
- Develop documentation supporting the software design documents, software test plans, inputs (estimates) to planning activity
- Interact with end users to define system requirements and provide support to resolve problems or enhance their understanding of systems
- Work to ensure the team meets the commitments made with regard to our projects and products; suggest work-around solutions where schedule or quality might be compromised
- Assist, as needed, with company-wide initiatives and meeting demands on the development team
- Interact with clients from time to time to gain greater understanding of client environments and needs related to RBRO products and quality

THE CANDIDATE

The ideal candidate to join our team would have the following:

Qualifications:

- College or University graduate in 3 year program
- Minimum 3 years of VS Studio; knowledge of .NET, IIS, JAVA, C++

- Solid web design and programming experience
- Solid capabilities with UML, XML, JavaScript, HTML 5, ASP.NET
- Windows 2003, 2008 server platform experience
- Understanding of Windows XP and Windows 7 desktop platforms
- Solid capabilities with AJAX
- Experience with SharePoint development
- Experience with SQL server and Transact SQL
- Experience with documentation management systems would be an asset
- Microsoft Office development an asset

Skills:

- Self-starter with the ability to master new concepts quickly
- Capable of understanding and organizing detailed technical information
- Clearly document ideas, concepts, designs, tests, results, feedback and other information in an organized manner
- Goal oriented to achieve project deadlines through self-motivation, persistence and determination
